The image features a large, metallic, segmented shield arching over a server rack. The shield is composed of many horizontal segments, each with a circular, crystalline or lens-like center. The server rack below is filled with various components, including circuit boards, cables, and labels. Some labels are partially legible, such as 'CN-cert', 'MCCF', 'Footed CC N°', '[CNI]', 'CCN CERT', and 'REPUBLICA DOMINICANA'. The overall aesthetic is high-tech and industrial, with a grey and blue color palette.

1. Presentation

Santo Domingo will become, from **27 to 29 May 2026**, the epicenter of **Ibero-American cybersecurity** with the celebration of the **VI Jornadas STIC & Congreso RootedCon**. For three days, the Dominican capital will bring together institutions, experts, operational commanders and industry professionals under a common objective: to build a true digital shield capable of preventing, detecting and responding in a coordinated manner to the threats affecting governments, critical infrastructures, companies and citizens.

The event, organized by the **National Cryptologic Centre (CCN) of the National Intelligence Centre**, the **Joint Cyber Command** and **RootedCON**, from Spain, together with the **National Intelligence Directorate (DNI)** from the Dominican Republic, consolidates its international dimension following the success of previous editions in Bogotá (2021), Medellín (2022), Punta Cana (2023) and Panama City (2024 and 2025). With each edition, the event has strengthened its role as a benchmark forum for knowledge exchange, alliance building and the development of shared capabilities across Ibero-America.

Under the motto **“A digital shield against cyber threats”**, this sixth edition aims to bring together key stakeholders to strengthen the regional cybersecurity ecosystem. Participation will be promoted among all members of **CSIRTAmericas**, in coordination with the Organization of American States (OAS); **parliamentarians** capable of advancing the regulatory and governance dimension, in collaboration with the Ibero-American Development Bank (IDB); as well as **ICT and cybersecurity leaders from public administrations** and **senior officials from the Dominican Republic**.

In addition, the Cyber Defense Commands of the Armed Forces of Ibero-American countries and Portugal will play a significant role, with the involvement of the **Ibero-American Cyber Defense Forum (FIC)**. The presence of members of the **State Security Forces and Corps** will also be encouraged, given the operational importance of their role in the investigation, attribution and response to cybercrime and other emerging threats.

The **private sector** will have an essential role, not only through companies sponsoring the event, but also through the participation of organizations from all strategic sectors – energy, tourism, telecommunications, banking, industry, transport, healthcare and technology – that need to strengthen their cybersecurity capabilities to protect their information, ensure business continuity and safeguard the future of their organizations. Alongside them, **universities and academic institutions** – key actors in talent development, research and knowledge transfer – will also play a central role.

With this new edition, the **VI Jornadas STIC & Congreso RootedCon** reaffirm their commitment to consolidating a stable space for cooperation among Ibero-American countries, promoting a shared culture of cybersecurity and digital resilience.

2. About the event

■ Organizers

CCN National Cryptologic Center

The National Cryptologic Centre (CCN) of the National Intelligence Centre is the Spanish authority responsible for ensuring the security of information and communications technologies (ICT) within the public sector, as well as the protection of systems that process, store or transmit classified information. Its mission is to strengthen the cybersecurity of public administrations and these systems through the development of technical capabilities, the definition of standards and the coordination of incident response, promoting a common framework of protection, resilience and trust in the digital environment.

To fulfil this role, it combines prevention, detection and response activities: it develops technical standards and guidelines; manages cyber incidents affecting Public Sector systems, companies and organizations of strategic interest to the country, and any classified systems through CCN; defines cryptographic policies and standards; and carries out the evaluation, certification and accreditation of ICT security products, systems and services that handle classified or sensitive information. In addition, it conducts technical analysis, auditing and specialized training activities, contributing comprehensively to ensuring the confidentiality, integrity and availability of information across the Spanish public sector.

JOINT CYBER COMMAND

The Joint Cyber Command is the body responsible for planning, directing, coordinating, controlling and executing actions to ensure the SAF's freedom of action in cyberspace. In order to fulfill its mission, it will plan, direct, coordinate, control and execute military operations in cyberspace, in accordance with the operational plans in force. Within the scope of these operations, it will carry out the necessary actions to guarantee the survival of the physical, logical and virtual elements critical for the Defense and the Armed Forces. It will also provide CIS support to the EMAD structure and will be responsible for the encryption equipment and the assigned crypto keys.

ROOTEDCON

/RootedCON[®]

A benchmark IT security conference in Spain that was born with the purpose of promoting the exchange of knowledge among members of the security community. It holds a congress once a year in Madrid, with top-level speakers and exceptional sponsors from all market sectors.

NATIONAL INTELLIGENCE DIRECTORATE (DNI)

The National Intelligence Directorate (DNI) of the Dominican Republic is the state body legally mandated to coordinate and direct the National Intelligence System, with the mission of conducting intelligence and counterintelligence activities for national and internal security, in order to prevent and counteract any risk, aggression, or threats to the security and defense of the State, such as organized crime, terrorism, drug trafficking, cybercrime, illegal migration, among others.

In exercising its powers, the DNI coordinates efforts with other public institutions for risk management, including those related to the digital environment. In terms of cybersecurity, its scope of action includes strategic coordination in response to incidents that impact critical infrastructure, government systems, and essential services, as well as issuing guidelines and receiving relevant information to strengthen the protection of national cyberspace, making it a key player within the institutional framework of digital security and protection in the Dominican Republic.

7.5. SPECIAL mode sponsorship

7.5.1. Sponsorship NETWORKING DINNER

Another highlight of the event is the networking dinner, a unique space where the main leaders and players in the cybersecurity sector meet, offering the sponsor a unique opportunity to establish connections. This meeting will take place on **wednesday May 27, 2026**, in the private space chosen by the organization to close the first day of the event with a flourish. This sponsorship option allows the Sponsor to be the image of the official dinner of the event and, therefore, be associated with one of the most relevant moments of the event.

Sponsorship includes the following aspects:

> Sponsorship of the **official dinner for 150 people**. The Organization reserves the possibility that 60% of the guests will be provided by the organization itself and the other 40% by the Sponsor. The logistics expenses will be covered by the Sponsor.

> **Logo**, insert size **L**, in:

** Invoicing will be made in Euros, although it will be possible to make payments in US dollars (including taxes and depending on the quotation at the time of payment of the invoice).

7.5.2. Sponsorship FRAMEWORK RETRANSMISSION STIC Room

This option offers the opportunity to be the Sponsor of the broadcasting frame of the STIC Room where the opening and closing ceremonies are held by the authorities (capacity of **+300 people**), thus having a greater number of attendees. The Sponsor of the STIC Room broadcasting framework will have brand visibility for both in-person and online attendees.

Sponsorship includes the following aspects:

- > **Screen frame** in the room (the online broadcast will carry a cover of the Conference together with the Sponsor's logo).
- > **Start-up banner on the projection screens** with the logo during the 15 minutes prior to the start of the event. It will be projected in person and online (text or image that appears before the presentation begins).

- > Mention in the **official Communiqué of the Conference**.
- > **Two (2) invitations to the Networking Dinner**.
- > **One (1) daily face-to-face invitation** for company personnel/clients.

Maximum 1 sponsor

Contribution:
2,750€ + 21% VAT

* The Organization will be responsible for the management of the reservations. If you wish extra rooms, please consult with the organization.

** Invoicing will be made in Euros, although it will be possible to make payments in US dollars (including taxes and depending on the quotation at the time of payment of the invoice).

7.5.4. Sponsorship SHOWCASE ACCREDITATIONS

In this option, your logo will be highlighted in a strategic place within the event: the accreditation area, specifically at the back of the counter. It is a space through which all attendees pass when registering, so it guarantees high visibility and outstanding presence, generating a direct impact.

Sponsorship includes:

- > **Logo**, insert size **S**, in:
 - o Photocall (official photos).
 - o Event posters.
 - o Event website (link to corporate website).
- > **Dissemination** of sponsorship in CCN's social networks.
